github.com/Ragavishan

## EDUCATION

### M.Sc. Data Science

Bharathidasan University

CGPA : 9.34 | 2026

### B.Ed.ComputerScience

TN Teacher Educational University

CGPA: 8.43 | 2021

### B.Sc.InformationTechnology

Bharathidasan University

CGPA: 7.26 | 2019

## TECHNICAL SKILLS

### Languages

Python, R, SQL, JavaScript

### ML / AI

Scikit-learn, TensorFlow,

PyTorch, YOLOv8, OpenCV

### Data & Viz

Power BI, Excel, MongoDB,

SQLite, Pandas, NumPy

### Frameworks

Flask, FastAPI, Raspberry Pi

### Tools

Git, VS Code, Jupyter

## SOFT SKILLS

- Analytical & Problem Solving
- Effective Communication
- Concept Simplification
- Adaptability to New Tools
- Team Collaboration

## CERTIFICATIONS

- Data Science: RProgramming – Udemy
- Data Analysis with Python – FreeCodeCamp
- SQL & Relational DB – IBM Cognitive Class
- Intro to SQL – Simplilearn (Dec 2024)
- Data Science using Python – Scalar
- Data Engineering & Big Data – GUVI | HCL

## ACHIEVEMENTS

- BestTeacher & Well-Wisher Award – 2023 & 2024
- Paper: AI-Based Emergency Victim Identification – Int'l Conference, 2024
- 1st Place – Poetry Competition, WINGS'19

## PROFILE SUMMARY

Results-driven ML Engineer and Data Science professional with 2+ internship stints in predictive modeling and system integration. Pursuing M.Sc. in Data Science with hands-on project experience building AI-powered detection systems and CAPTCHA security tools using Python, YOLOv8, Flask, and FastAPI. Seeking a Software Engineer / ML Engineer role to apply practical skills in model development, deployment, and data-driven problem solving.

## WEB DEVELOPMENT PROJECTS

### Healthcare Web Application

Tools: Next.js, React, TypeScript, Tailwind CSS, JavaScript

- Developed and deployed a fully responsive, production-ready healthcare platform, optimizing UI navigation and SEO ranking via Next.js server-side rendering.

### Chengene Web Platform

Tools: React, TypeScript, Tailwind CSS, JavaScript (ES6+)

- Engineered a high-performance web application with modern interactive components using a mobile-first approach for seamless cross-device user experience.

### Personal Developer Portfolio

Tools: Next.js, React, TypeScript, Tailwind CSS

- Designed and launched a personal developer portfolio featuring modular, type-safe components to showcase production projects with excellent performance scores.

## INTERNSHIP EXPERIENCE

### ML Intern | CodeTech IT Solutions Dec 2024 – Mar 2025

- Fraud Detection Pipeline: Engineered Decision Tree and Random Forest classifiers achieving 92% accuracy, utilizing feature engineering and cross-validation to cut overfitting by 15% while tracking precise precision/recall metrics.

### ML & Python Intern | Stax Tech IT Solutions Apr 2025 – May 2025

ML Inference Pipeline: Developed 3+ Scikit-learn models integrated with

- REST APIs for real-time inference, optimizing preprocessing pipelines to reduce training time by 20%.

## PROJECTS

### AI-Driven Security Analysis of Reverse-Text CAPTCHAs

Tools: Python, Flask, SQLite, HTML, CSS, JavaScript

CAPTCHA Testing Tool: Developed a Flask & Python security tool utilizing

- image encoding for reverse-text generation, integrating an SQLite backend for 500+ test cases to achieve 85% attack detection accuracy via REST APIs.

### AI-Powered Smart Animal Detection & Scaring System

Tools: Python, YOLOv8, OpenCV, TensorFlow/PyTorch, FastAPI, SQLite, Raspberry Pi

Wildlife Intrusion System: Built a YOLOv8 & FastAPI pipeline achieving 88%

- mAP on 1,200 custom images, processing live OpenCV frames to trigger Raspberry Pi GPIO alerts within <500ms while reducing false positives by 30%.

## RESEARCH & INNOVATION

### Paper: AI-Based Emergency Victim Identification using ML

Int'l Conference

2024

Proposed an ML pipeline (CNN + SVM ensemble) for victim identification from

- emergency footage; presented methodology and evaluation results to international audience.

### AI-Based Kindergarten Safety Monitoring System

Hackathon

- Developed a real-time child safety monitoring prototype using YOLOv8 for person detection and OpenCV for boundary breach alerts on edge hardware.
